LinkedIn: <https://www.linkedin.com/in/thakorkrishna/>

## SUMMARY

- Over 5+ years of progressive experience in the full software development lifecycle (SDLC), specializing in Requirement Analysis, Design, Development, and Implementation of Web-based applications.
- Proficient in employing Agile and Waterfall methodologies to ensure efficient project management and timely deliverables; Demonstrated expertise in crafting intuitive user interfaces and seamless user experiences through mastery of front-end technologies such as HTML5, CSS3, JavaScript, React, and Material-UI (MUI), coupled with back-end proficiency in Node.js, Prisma, and GraphQL.
- Skilled in integrating GraphQL and REST APIs for robust data exchange between front-end and back-end systems, ensuring optimal performance and functionality.

## EDUCATION:

**Conestoga College - Waterloo, ON**

**May 2021 – Aug 2022**

Post Graduate Certificate Program: Mobile Solutions Development

**BMIT Affiliated with Uka Tarsadia University**

**June 2016 – May 2019**

Bachelor of Science: Information Technology

## WORK EXPERIENCE

**Viral Nation, Toronto, ON - Software Developer**

**April 2023 - Present**

- Spearheaded the design and development of user-centric websites and interactive documents, leveraging JavaScript, HTML5, CSS3, and Material-UI (MUI) to create visually compelling and engaging interfaces.
- Employed React.js with advanced hooks and components to optimize web application performance, ensuring seamless navigation and responsiveness across various devices and platforms.
- Orchestrated the integration of GraphQL and REST API endpoints, facilitating robust data exchange between front-end and back-end systems, with Prisma serving as the cornerstone for efficient data management and retrieval.
- Pioneered the development of an NPM Package for Theme and Shared Library, streamlining the implementation of design elements and enhancing code reusability across projects.
- Committed to maintaining code quality and scalability through rigorous code reviews and refactoring, ensuring adherence to best practices and standards throughout the development lifecycle.

**Bliss Ladders, Thunder Bay, ON - Software Developer**

**Aug 2021 – April 2023**

- Led the design and development efforts for front-end websites, meticulously crafting JavaScript-driven interfaces and optimizing HTML5 and CSS3 code for enhanced performance and user experience.
- Implemented robust PHP and JavaScript validation mechanisms, ensuring data integrity and security across web applications.
- Leveraged React.js for templating and component-based development, accelerating project timelines and enhancing code maintainability.
- Actively contributed to the adoption of Object-Oriented JavaScript principles and design patterns, fostering code modularity and scalability across projects.

**ITLuxTech, India- *Software Developer***

**Jan 2019- April 2021**

- Spearheaded the development and enhancement of mission-critical applications using cutting-edge technologies, including React for front-end and NodeJS for back-end.
- Leveraged advanced cloud platform tools such as Kubernetes, Docker, and GitHub to ensure seamless deployment and scalability of applications.
- Oversaw and managed large-scale projects in an Agile environment, demonstrating leadership in the day-to-day development and deployment of complex technical objects globally.
- Applied in-depth knowledge of databases, both SQL and NoSQL (Cassandra), optimizing data storage and retrieval mechanisms.
- Employed Git for version control, ensuring a streamlined and collaborative development process.
- Collaborated closely with UX teams to craft engaging and adaptive customer experiences.
- Implemented and configured monitoring and logging tools such as Prometheus, Spotlight, Grafana, and Splunk for real-time performance analysis and issue resolution.
- Actively participated in Agile (Scrum) methodology, fostering a growth-oriented mindset, and contributing to continuous improvement.
